Hydrostatic travel drive, electronically controlled

Performance

Power and innovative technology are features of Liebherr's generation 4 crawler tractors. Their excellent power-to-weight ratio stands for maximum productivity in all operating conditions. Whether ripping hard ground, moving material or grading surfaces, the outstanding performance of the PR 744, PR 754 and PR 764 never fails to impress.

Economy

Liebherr's economic advantages are undisputed: like all Liebherr machines, the PR 744, PR 754 and PR 764 save money by being so easy to service, with shorter down times and lower maintenance costs. The Liebherr diesel engines combines performance with economy, and with the machines' efficient drivetrain, impressive power is available at minimum fuel consumption.

Reliability

Sturdy and strong: Liebherr crawler tractors and the materials used to build them are designed for long, trouble-free life. Components subject to severe loads are made from highstrength materials, and points exposed to possible damage are well protected. Liebherr crawler tractors owe their high levels of availability to these stringent reliability standards.

Comfort

The operator of a generation 4 Liebherr crawler tractor works in a cab of generous size, with controls laid out according to the latest ergonomic principles. This well-designed cab provides an ideal view of the work area and the working equipment. Intuitive single joystick control makes for sensitive and accurate dozer operation.

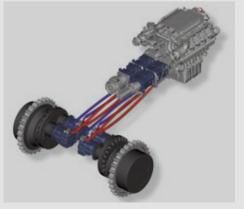

Liebherr diesel engines featuring the latest technologies:

- Electronically controlled, the power output and torque curves are designed for outstanding productivity when pushing or ripping.
- An extra-deep oil sump maintains engine lubrication at slopes of up to 45 degrees for PR 744, PR 754 and 40 degrees for PR 764.

Performance

Liebherr has successfully been building crawler tractors with hydrostatic transmission for the past thirty years. The latest generation 4 of models are powerful machines capable of tackling a wide range of tasks.

Outstanding productivity

Impressive power and drawbar pull	The powerful Liebherr diesel engine, combined with Liebherr's innovative driveline, makes ample power available for every working situation. The hydrostatic drive requires no gear shifting: engine power reaches the tracks without interruption, even when turning.
Efficient pushing and ripping	Thanks to the hydrostatic transmission, the operator simply selects the most suitable working speed. The system automatically maintains peak engine rpm and power efficiency. Track slip is kept low and maximum power is continuously transferred to the tracks.
Bogie suspension	For work on uneven or rough surfaces, Liebherr offers different types of bogie undercarriages for increased traction and pushing power.
Outstanding manoeuvrability	The hydrostatic drive is particularly suitable for ripping work. The machine can be turned quickly, the rear rip- per positioned accurately between hard rock layers, and the material broken out with the necessary force.
Blade curvature for top transport capacity	The blades for the PR 744, PR 754 and PR 764 have had their penetration and rolling behaviour optimised, to increase their transport capacity.
Low centre of gravity	The driveline assemblies are compact so that the com- plete machine has a very low centre of gravity, thereby allowing safe operation on steep slopes.
Generous ground clearance	The well-planned component layout is designed for maximum ground clearance. Heavy duty belly pans prevent damage when working on rough stone or rock.

Liebherr hydrostatic transmission

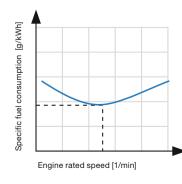

- Automatic speed and torque adjustment keeps the engine working at optimal power as the load changes.
- At low ground speeds, for instance during ripping work, the thermal loads on the hydrostatic travel gear are kept low. The driveline's high efficiency remains available in all speed ranges.

Oscillating roller tracks

- When working on uneven surfaces, oscillating bogie undercarriages increase the ground contact area and improve traction. In addition, the resilient mountings effectively absorb shock loads.
- For work on softer, more yielding surfaces such as coal or wood chips, tracks with rigid rollers are used.

Constant engine speed keeps fuel consumption low

• Since the engine's nominal operating speed is in the region of its lowest specific fuel consumption, maximum operating economy is assured.

Economy

Liebherr crawler tractors are designed with economy in mind, featuring low fuel consumption, high productivity, extended component life and minimum maintenance costs.

Low fuel consumption

Constant low engine speeds	The Liebherr diesel engine always operates at a con- stant speed – in the most economical rpm range – re- gardless of the actual travel speed. This avoids unnec- essary fuel consumption. A low mean piston speed boosts cylinder filling and leads to more efficient combustion of the fuel-air mixture.
Efficient driveline	Hydrostatic transmission delivers the best possible level of efficiency over the full speed range. Even when peak power at low ground speed is required – e.g. when ripping – the oil temperature remains low.
Load-sensing implement hydraulics	This system keeps energy consumption down to the level needed by the hydraulics at any given moment. It saves fuel when the work tools are not being operated.

Low maintenance costs

Good accessibility	All the diesel engine's servicing points are grouped together centrally, and can be easily reached. The hy- draulic tilt cab makes it even easier to reach the various mechanical assemblies for quick, effective servicing.
Longer maintenance intervals	Maintenance intervals are optimally matched to the various components and assemblies. Where parts are exposed to dirt and dust, for instance on the pushing frame, maintenance-free bearings are used.

Long-life tracks

Large track components High-quality components with ample dimensions prolong the operating life of the undercarriage.

Tiltable cab

• For easy, quick access to all drivetrain and hydraulic components.

Simple maintenance

 All the servicing points are located centrally and are easy to reach, to minimise the time spent on daily inspection work.

Liebherr Litronic control system

- Liebherr's Litronic control system matches travel speed ideally to the task at hand.
- Track slip is kept to a minimum in pushing as well as in ripping applications; this improves power transmission and prolongs track life.

The ideal configuration for every task

- There is a mining version for use on abrasive materials. Optional wear plates increase machine operating life before components have to be replaced.
- Liebherr offers special machine configurations for landfill, coal, or woodchip applications, as well as for low ambient temperatures.

Reliability

Well-proven technologies and high quality are what keeps a machine ready for use. Liebherr develops and builds its own components and assemblies specifically for use on construction and civil engineering machinery, so that their strength can be guaranteed however arduous the task.

Liebherr powertrain

Reliable construction- machinery engines	Liebherr diesel engines have been developed for the toughest imaginable operating conditions. A rigid lad- der-type frame reduces engine vibration and provides the strength needed for maximum operating reliability and long service life.
Wear-free driveline concept	A tried and tested system: Liebherr's hydrostatic travel drive needs no torque converter, manual-shift gearbox, differential steering or steering clutches. The system's hydraulic pumps and motors are standardised, effective- ly wear-free in operation and exceptionally reliable.
Long-life final drives	Of ample dimensions, Generation 4 final drives are de- signed to withstand the most severe loads. Double trans- mission seals with automatic leak detection enhance reli- ability even more.

Robust steel construction

Box-section main frameThe main frame is of box-section design – a wellprov-
en principle for maximum torsional stiffness and optimal
absorption of forces. Cast steel is used for components
subject to high stress.Rear ripperLiebherr rippers are built for heavy-duty tasks, and have
extra protection at all areas exposed to wear.

Secrets of long-term reliability

Modern cooling system	Two hydrostatically driven fans and a wide-meshed radiator guarantee optimal cooling performance, even in dusty environments.
Protected electrics	High quality cable protection prevents mechanical damage to the cable harness.

Component endurance tests

- Even at the design stage, components are subjected to FE analysis in order to determine their dimensions in relation to the loads they will encounter.
- All components undergo longterm laboratory and field testing, and only those that comply with Liebherr's high quality standards are approved for production.

Modern cooling system

- Two electronically controlled fans draw in the volume of air actually needed to keep the hydraulic fluid and engine oil temperatures stable as loads vary. All components operate in their most favourable temperature ranges, thus avoiding unnecessary strain and prolonging their trouble-free operating life.
- Cooling air is drawn in from clean zones around the machine, to keep dust contamination to a minimum.
- Optional: a reversible fan for automatic radiator cleaning when operating in extremely dirty or dusty conditions.

Intuitive single joystick control

- Fingertip speed control: three travel speed ranges can be preselected and programmed individually by push-button: Initial settings
 Stage 1: 0 2.5 mph Stage 2: 0 4.0 mph Stage 3: 0 6.8 mph
- Memory function Each time the machine is restarted, all existing settings are retained.

Inching brake pedal

 In addition to the travel joystick, the operator can control speed via a pedal and apply the brakes if necessary.

1 Inching function 2 Braking function

Comfort

The operator's work area has been redesigned for an exceptionally high level of comfort and convenience. There is ample space, the controls are laid out ergonomically and the noise level is low. Liebherr cabs provide perfect conditions for concentrated work without fatigue. The excellent view makes safe, accurate operation much easier.

Outstanding cab design

Ergonomics	The well-planned cab layout makes conditions ideal for stress-free, efficient operation of the machine. All in- struments and controls are clearly laid out and within easy reach.
Low noise levels	Thanks to effective sound insulation and the use of modern, quiet-running diesel engines, the PR 744, PR 754 and PR 764 feature exemplary noise levels that are well below the legal limits.
Outstanding view	Integral ROPS/FOPS protection and large-area cab windows provide the operator with the best possible view in every direction.

Simple, precise control

Single joystick control	A single joystick controls all travel movements conven- iently and accurately, including the 'counter rotation' function.
Stepless speed control	Ground speed can be selected without gear changes and therefore with no interruption to the transmission of power.
Safety in every situation	Even on steep gradients, the crawler tractor is always positively driven. Since the system cannot freewheel (hydrostatic transmission), the operator controls braking simply by moving back the travel joystick. When the ma- chine comes to a halt, the parking brake is applied auto- matically for additional safety.

Well-planned details

- A big storage compartment is a standard feature, and includes a 12 Volt power socket to supply a cooler.
- The seat with its wide range of adjustments and three-position armrests helps to provide a pleasant work area for the operator.
- Many other details, for example a sliding side window, tinted glass and a footrest, add to the operator's comfort still further.

Excellent view of rear-end attachments

- ROPS/FOPS protection is integrated into the cab, with large-area windows
- Good view of ripper and surrounding work area
- Direct view of ripper adjusting pin

Engine	
Liebherr Diesel engine	D 9508 A7 Emission regulations according to 97/68/EC, 2004/26/EC Stage IIIA and EPA/CARB Tier 3
Rated power (net) ISO 9249 SAE J1349	310 kW/422 HP 310 kW/416 HP
Maximum power (net) ISO 9249 SAE J1349	357 kW/486 HP 357 kW/479 HP
Rated speed	1,600 rpm
Displacement	16.2 I/989 in ³
Design	8 cylinder V-engine (wet-sleeve) water-cooled, turbocharged, air-to-air intercooler
Injection system	Direct fuel injection, common Rail system, electronic control
Lubrication	Pressurised lube system engine lubrication guaranteed for inclinations up to 40°, on all sides
Operating voltage	24 V
Alternator	80 A
Starter	7.8 kW/11 HP
Batteries	2 x 225 Ah/12 V
Air cleaner	Dry-type air cleaner with pre-cleaner, main and safety elements, control light in the operator's cab
Cooling system	Combi radiator, comprising radiators for water and charge air. Hydrostatic fan drive

Travel drive, control

Transmission system	Infinitely variable hydrostatic travel drive, independent drive for each track
Travel speed* Speed range 1 (reverse): Speed range 2 (reverse): Speed range 3 (reverse):	Continuously variable0 - 4.0 km/h/2.5 mph(4.8 km/h/2.9 mph)0 - 6.5 km/h/4.0 mph(7.8 km/h/4.8 mph)0 - 11.0 km/h/6.8 mph(11.0 km/h/6.8 mph)*Pre-adjusted, all speed ranges can be customised on the travel joystick (memory function)
Electronic control	The electronic system automatically adjusts travel speed and drawbar pull to match changing load conditions
Steering	Hydrostatic
Service brake	Hydrostatic (self locking), wear-free
Parking brake	Multi-disc brake, wear-free, automatically applied with neutral joystick position
Cooling system	Separate oil cooler, hydrostatic fan drive
Filter system	Micro cartridge filter in replenishing circuit
Final drive	Combination spur gear with planetary gear, double sealed (duo cone seals) with temperature indicator
Control	Single proportional joystick for all travel and steering functions

	.3
Hydraulic system	Load sensing (demand-controlled)
Pump type	Swash plate piston pump
Pump flow, max.	352 l/min/77.9 gpm
Pressure limitation	260 bar/3,770 PSI
Control valve	2 segments, expandable to 4
Filter system	Return filter with magnetic rod in the hydraulic tank
Control	Single joystick for all blade functions

Undercarriage

Mounting	Via separate pivot shafts and equalizer bar
Track chains	Lubricated, single-bar grouser shoes, tensioning via steel spring and grease tensioner
Links, each side	44
Track rollers, each side	7
Carrier rollers, each side	2
Sprocket segments	3 each side
Track shoes, standard	610 mm / 24"
Track shoes, optional	660 mm/26", 711 mm/28", 760 mm/30"

Operator's cab

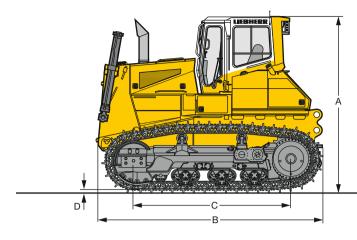

Cab	Resiliently mounted cab with positive pressure ventilation, can be tilted with hand pump 40° to the rear. With integrated ROPS Rollover Protective Structure (EN ISO 3471) and FOPS Falling Objects Protective Structure (EN ISO 3449)
Operator's seat	Comfort seat, fully adjustable
Monitoring	Combined analogue / LC display, automatic monitoring of abnormal operating conditions

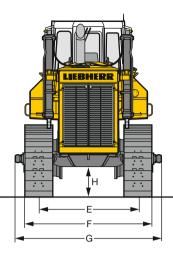

6	
Sound en	nissions
Operator sound	$L_{pA} = 79 \text{ dB}(A)$
exposure ISO 6396	(in the cab)
Exterior sound pressure	$L_{wA} = 114 \text{ dB}(A)$
2000/14/EC	(to the environment)

Refill capacities	
Fuel tank	860 I / 189.2 Imp.gal.
Cooling system	85 I / 18.7 Imp.gal.
Engine oil, with filters	701/ 15.4 Imp.gal.
Splitter box	6.41/ 1.4 Imp.gal.
Hydraulic tank	281 I / 61.8 Imp.gal.
Final drive, each side	22.5 I / 4.9 Imp.gal.

	lb	11,023
Counterweight with storage	kg	4,750
compartment	lb	10,472
Other counterweights available.		

Equipment

Pres muching	4	4	4
Base machine	744	754	764
Tow switch	٠	•	•
Towing hitch rear	٠	•	٠
Towing lug front	•	•	•
Battery compartment, lockable	٠	•	•
Belly pans, heavy-duty	•	•	•
Radiator, wide-meshed	٠	•	•
Radiator guard, hinged	٠	•	•
LiDAT - Liebherr data transmission system	٠	•	٠
Liebherr Diesel engine	•	•	•
Fan, hydraulically driven	٠	•	•
Fan guard	•	•	•
Engine cover, perforated	٠	•	٠
Engine doors, perforated	•	•	•
Engine doors, hinged, lockable	٠	•	٠
Lugs for crane lifting	•	•	•
Fuel water separator	٠	•	٠
Air filter, dry-type, dual step	•	•	•
Air filter with automatic dust ejector	٠	•	٠
Toolkit	•	•	•
Forestry equipment	+	+	+
Landfill equipment	+	+	+
Tank guard, complete	+	+	+
Refueling pump, electric	+	+	+
Diesel particle filter	+	+	+
Radiator guard, heavy-duty	+	•	•
Liebherr bio-degradable hydraulic oil	+	+	+
Special paint scheme	+	+	+
Fuel water separator with electric heater	+	+	+

Travel drive	744	754	764
Parking brake, automatic	•	•	٠
Function control, automatic	•	•	٠
Control, single joystick	•	•	•
Load limit control, electronic	٠	•	٠
Electronic control	•	•	٠
Travel control, 3 speed ranges	•	•	٠
Hydrostatic travel drive	•	•	•
Inching brake pedal	•	•	•
Emergency stop	•	•	•
Oil cooler	•	•	٠
Final drives planetary gear	•	•	•
Safety lever	•	•	٠

Undercarriage	744	754	764
Track frame, closed	٠	٠	•
Sprocket segments, bolted	٠	•	٠
Master link, two-piece	•	•	•
Tracks oil-lubricated	٠	•	٠
Undercarriage, rigid	-	•	-
Track frames, oscillating	•	٠	٠
Pivot shaft, separate	٠	•	•
Track shoes, moderate service	•	-	-
Track shoes, heavy duty 1)	+	•	•
Track pads with mud hole	+	+	+
Track guide centre part	+	+	+
Track guard	+	+	+
Undercarriage with single bogie	_	+	+
suspension	_	+	+
Undercarriage with double bogie	_	_	+
suspension			Ŧ
Undercarriage LGP	+	+	-
Sprocket segments with recesses	+	+	+

Operator's cab	744	754	764
Storage compartment	•	٠	٠
Armrests 3D adjustable	•	•	•
Pressurised cab	•	•	•
Operator's seat, 6-way adjustable	•	•	•
Dome light	•	•	•
Coat hook	•	•	•
ROPS/FOPS	•	•	•
Rear-view, inside	•	•	•
Safety glass, tinted	•	•	•
Windshield washer system	•	•	•
Windshield wipers front, rear, on the			
doors, with intermittent function	•	•	•
Sliding window, left	٠	•	•
Sun visor	•	•	•
Socket 12 V	•	•	•
Warm water heating	•	•	•
Operator's seat, air suspended	+	+	+
Fire extinguisher	+	+	+
Air conditioning	+	+	+
Cooler	+	-	-
FM radio	+	+	+
Radio preinstallation	+	+	
Sliding window, right	+		
Protective grids for windwos	+	+	+
Extension, seat back	+	+	+

4			
Electrical	744	754	764
system	`	~	
Starter 7.8 kW	•	•	•
Working lights front, 4 units	•	•	•
Working lights rear, 2 units	•	٠	•
Batteries, cold start, 2 units	•	•	•
Battery main switch, mechanical	•	•	•
On-board system, 24 V	•	٠	•
Alternator 80 A	•	•	•
Horn	•	•	•
Back-up alarm	+	+	+
Beacon	+	+	+
Electronic start lock	+	+	+
Additional lights, rear	+	+	+
Additional lights, front on lift cylinders, 4 units	+	+	+

Control and warning lights	744	754	764
Control and travel speed range (digital)	•	٠	٠
Control engine coolant temperature (analogue)	•	•	•
Control fuel level (analogue)	•	•	٠
Hour meter (analogue)	•	•	٠
Warning light battery charging	•	•	٠
Warning light diesel engine	•	•	٠
Warning light electronic travel control system	•	•	•
Warning light travel drive seal, each side	٠	•	٠
Warning light parking brake	•	•	•
Warning light fuel water separator	•	•	٠
Warning light fan control	•	•	•
Warning light pump repleneshing pressure	•	•	٠
Warning light float position blade	•	•	•
Warning light oil return filter	•	•	•
Warning light air filter	•	•	•
Warning light heater Diesel engine	•	•	•
Main warning light	•	•	•
Warning light hydraulic oil temperature	•	•	•
Hydraulic oil temperature gauge	+	-	-
Warning light hydraulic oil level	+	-	-

H			
Hydraulic system	744	754	764
Variable flow pump, load sensing	٠	٠	٠
Oil filter with strainer in hydraulic tank	•	٠	•
Blade quick drop	•	•	•
Control valve for 2 circuits	•	٠	•
Float position blade	•	•	•
Hydraulic servo control	•	٠	•
Hydraulic control ripper	+	+	+
Hydraulic control winch	+	+	+
Hydraulic tank oil level control	+	+	+

Attachments		744	754	764
Mounting plate for external equipr	nent	+	+	+
Drawbar rear, rigid		+	+	+
Drawbar rear, swivelling		+	-	-
Counterweight, rear		+	+	+
Ripper, 1 shank		+	+	+
Ripper, 3 shanks		+	+	+
Straight blade	2), 3)	+	-	-
Semi-U blade	2), 3)	+	+	+
U blade	2)	-	+	+
Mechanical angle blade	2)	+	+	-
Winch		+	+	+
Spill plate for blade		+	+	+
